3 November 1958

MEMORANDUM FOR: Special Assistant to the DCI for
Planning and Development

SUBJECT: [redacted] Accomplishment in
Reported Development of New High
Resolution Emulsions and Developers

25X1

REFERENCES: A. PIC/D-7-58, dtd 1 Oct 58
B. Memo for the Record, dtd 28 Oct 58

1. In my referenced memorandum to the AD/BI a copy of which is attached, I called attention to [redacted] work with new high resolution emulsions and developers. My men, [redacted] were very much impressed with the sample products they reviewed at [redacted] laboratory. On 23 October 1958, I cited this work to you and mentioned the unidentified flying objects which were recorded in this high resolution photography which [redacted] states that he can enlarge some 200 diameters.

2. You seemed to be interested in this work and thought that we should try to obtain some of these photographs for analysis at PIC. With your concurrence, it would be my intention now to meet with [redacted] somewhere away from CIA to see if I can review his photographic accomplishments. If they appear to be as excellent as my men have found them to be, I would encourage [redacted] to use his procedures in an effort to secure the data which could be applied to CIA requirements in the field of photo technology research and development.
